EUROLISTE / BGL - What' this ?

- Since decades the German BAUGERÄTELISTE (BGL) has been a valuable and useful tool for the planning, organization and costing of construction plant and equipment in the German, Austrian and Belgian construction industries.
- Especially recognised by construction firms for estimating the internal apportionment of costs where companies share the use of equipment or work together in joint ventures, BGL is even used by contractors, sworn valuers, consultants and assessors for tax purposes.
- Since the beginning of 2001, the BGL has been undergoing a transformation into a European harmonized construction plant nomenclature known as the "EUROLISTE"®, which was carried out in close consultation with the national member federations represented in FIEC.

Technisch-wirtschaftliche Baumaschinendaten

Core elements of the new “BGL 2007” –

Common base of the new European data structure ...

- **Standart reference texts** for each Group / Type of equipment
- **Harmonised technical parameter(s)** for each type of equipment
- **General principle of Classification:** Main technical parameter identifies size of equipment (as simple as effective)
- **Average equipment prices / value of the plant** based on 2006, assigned to each size of equipment
- **Rate of repair costs** relating to the average value of the plant

EUROLISTE / BGL 2007

EUROLISTE
BGL
2007

Baugeräteliste

Technisch-wirtschaftliche Baumaschinendaten

Additional country-specific characteristics of BGL 2007 –

differing elements to adapt national needs in a common data base

- **National statistical producer price index** for Construction Machinery and Equipment to adjust the average prices listed in the database
- **Rate of amortisation costs** (tax, depreciation for interest return) relating to the average value of the plant
- **Catalogue of spare parts**, which can serve as an indication of a meaningful demarcation of the scope of repairs and maintenance which are likewise necessary in the context of overall plant costs.

EUROLISTE / BGL 2007

**EUROLISTE
BGL

Baugeräteliste
Technisch-wirtschaftliche Baumauszeichnungen

BGL 2007 - what's new ?

- **New equipment added** (for ex. scaffoldings, shutterings)
- **Average prices updated**
- **Sub-Classification in several major groups adjusted** and harmonised to EUROLISTE
- **Data harmonisation with Austria fully completed**
- **Catalogue of spare parts implemented**
- ...at least the modern data bank architecture

The diagram illustrates the modern data bank architecture of BGL 2007. At the center is the 'Datenbank EUROLISTE / BGL'. Arrows point from this central database to various output channels (Content-Ausgabe) and input channels (Content-Eingabe).

Content-Ausgabe (Output Channels):

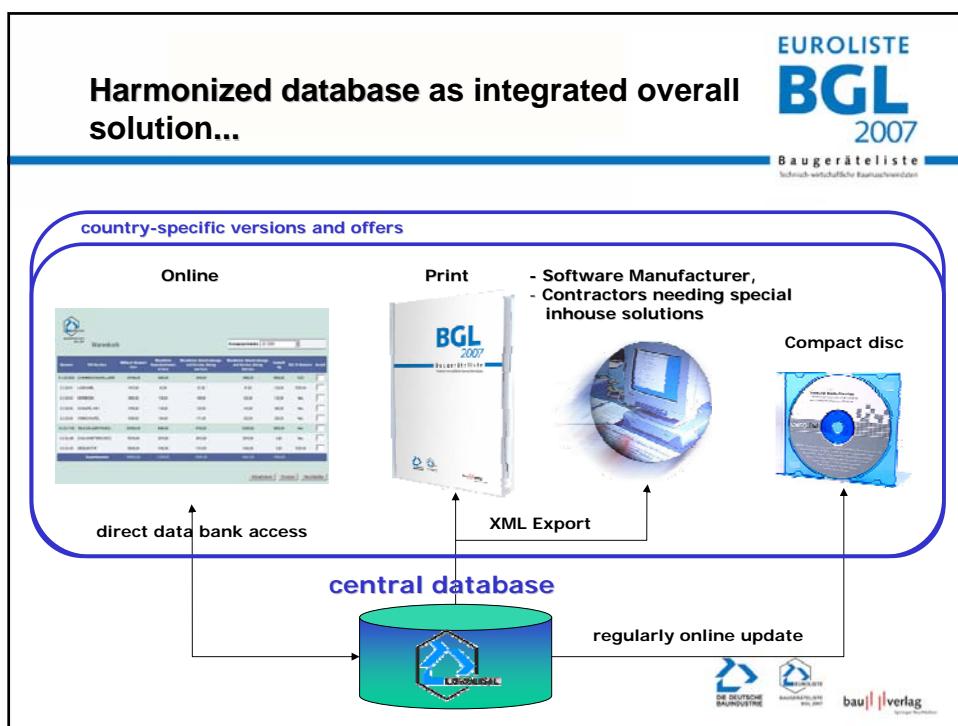

- Automatisiert: DTP, Office, RTF
- Manuell: E-Mail, Web-formulare, Redakteursbeiträge, Office, Print, PDF, DTP, PRINT
- DISC
- ONLINE: XML, DB-Plugin, Website, Intranet, Extrinet, I-Mode, E-Mail, SMS, WAP, CD, DVD, FAX, RTF, PRINT

Content-Eingabe (Input Channels):

- Automatisiert: XML, DB-Plugin, Website, Intranet, Extrinet, I-Mode, E-Mail, SMS, WAP, CD, DVD, FAX, RTF, PRINT
- Manuell: Redakteursbeiträge, Office, Print, PDF, DTP, PRINT

Screenshots:

- Left screenshot:** A screenshot of the BGL software interface showing a list of items under 'Baugeräteliste - Preis- und Anwendung'.
- Right screenshot:** A screenshot of the BGL software interface showing a list of items under 'Baugeräteliste - Preis- und Anwendung'.

EUROLISTE / BGL 2007

Baugeräteliste
Technisch-wissenschaftliche Baumaschinendaten

Funktionality of the database

- multilingual organization in choice of language and national version
- Indication of all commercial data
- Indication of all additional devices
- Build up of individual equipment baskets
- fast and simple data processing and data integration into various user systems across Europe
- freedom to use all web technologies

EUROLISTE
BGL
2007

Baugeräteliste
Technisch-wissenschaftliche Bauausstauschdaten

- 
- 1998: FNTP and HDB finalize their work of structuring EUROLISTE
 - 2001: FIEC adopts EUROLISTE as harmonized structural guideline
 - 2001: German equipment committee publishes BGL 2001 as first catalogue referring to the new European EUROLISTE classification.
 - 2004: The national Federations of HDB (Germany), VIBÖ (Austria), Confederatie Bouw (Belgium) start updating and harmonising the Core data of BGL 2001.
 - 2006: FIEC TEC 4 - „Constructional Plant and Equipment“ gets started
 - 2007: Contact Germany (HDB) France (FNTP): Adaptation of EUROLISTE
 - 2007: The new BGL 2007 gets published
 - 2007: Contact Germany (HDB) Greece (SATE) to adopt EUROLISTE / BGL
 - 2008: Expected: Publishing of ÖBGL (Austrian Version by VIBÖ)
 - 2008: Expected: Spain (SEOPAN) Processing Translation EUROLISTE/BGL
